

LaVie
24.11.16 RR

Colin LaVie gives notice that he will ask the Minister responsible for Transportation and Energy the following question:

In the winter months travelling is always a concern and I know safety is always a number one priority. To ensure the safety of Residents having a weather camera installed on the Souris Beach would be a benefit to those who need to travel in the winter months to check and monitor road conditions. Can the department look into installing a weather camera on the Souris beach?
